CARGO TIPPER 2

CARGO TIPPER2 THE PERFECT BALANCE

5 5 YEAR
CHASSIS
WARRANTY

Tipper trailers joined the Brian James Trailers range in 2009 with the first generation proving our unique solutions to many of the long standing design challenges.

Tipper2 had to be incredibly robust, yet able to carry and tip meaningful loads. It had to be high enough for site access and tipping ability, yet possess a low centre of gravity for best towing and loading performance. We feel that nearly 40 years of experience have been employed wisely in devising unique and successful solutions to these challenges.

Expect the best. **Tipper2** will provide it.

CARGO TIPPER2

CARGO TIPPER 2

CARGO TIPPER2

The Perfect Balance

Our objective was simple. Make a tougher, safer **Tipper** trailer with class leading technologies employed where appropriate to reduce weight and enhance operation standards. In every meaningful way the **CarGO Tipper2** has succeeded.

No other product in the sector can match **Tipper2**'s unique combination of value, features and quality. Unrivalled safety systems such as an audible warning when the bed lowers will instantly appeal to any health and safety conscious operator. The 270° hinged doors combined with a very steep tip angle offer the cleanest exit for heavy or bulky loads and minimises operator risk.

But making trailers this capable doesn't mean making them heavy; by choosing high grade steels and aluminium our engineers have made the strong and light chassis of the **CarGO Tipper** even stronger and lighter, which means the new **CarGO Tipper2** benefits from even greater load carrying and efficiency.

- Tough, durable and low-friction **bed surface** combined with a high tilt angle of nearly 60° means that materials will conveniently discharge.

- **Reinforced, bonded phenol ply with steel lined deck**
A brand new aluminium extrusion is a unique solution to the challenge of fixing the heavy duty deck into the chassis. Bonding the outer 2mm steel deck liner to the 18mm industrial grade phenol ply creates a very tough and durable load bearing surface, with the added benefit of easily discharging the load during tip operation.

- **Heavy duty drop sides**
Features 2mm steel material and distinctive yellow body work, bringing high levels of visibility and safety. Headboard fully removable.

- **New deck construction**
with no fasteners in vulnerable positions, making tipping, cleaning and shovelling easy.

- **Flush internal fixtures**
ensuring no opportunities for materials to become trapped and retained once tipped.

- **Side hinged rear doors**
New hinge and latch mechanism is well engineered to provide an easy and reliable operation.

- **Corner and centre posts**
can be fitted and removed in seconds.

● **Integral tie-down points** inside the bed offer a significant benefit to any operator carrying machinery. Experience the convenience of multiple points, all as standard. Load loss is prevented with a spring steel flap.

● **Safety stand** for maintenance and repair.

● **Rope hooks and eyes** along both sides, under deck.

● **New rear lighting** arrangement with CarGO Connect lighting kit.

○ **Upgrade to full LED lighting**
Replace bulbed rear lamps with LED technology. Super bright and extremely durable.

● **Integral coupling head lock**

● **Storage box** is ideal for keeping remote control, jump lead set and straps conveniently to hand.

● **Spare wheel** stored in rear under tray, released from the rear without having to tip the load.

● **4m version incorporates twin hydraulic rams** that enable tipping of exceptionally large/heavy loads.

CARGO TIPPER 2

OPTIONS

Tip the balance in your favour

If you need it, it's fitted. If you want it, it's here.

In designing the ultimate tipper trailer we set out to create a full working package, exactly what is needed to maximise the utility of the **CarGO Tipper2**.

For specific operations we designed a variety of suitable options, all detailed across the following pages.

O High panelled side extension kits enable the transport of bulkier loads. Light weight, yet robust panels can be individually removed, along with the quick release retaining posts. This enhanced functionality makes **Tipper2** easily configurable.

Features top hinged/removable rear panel.

O Rear stands with kick down action provide support for loading.

O CarGO Connect ramps

Trailer equipped with ramp rack as standard.

Choose:

1.8m ramps for general loading purposes or
2.3m ramps for lowest possible loading angle.

○ Choice of 12" (3,500kg)
and 13" (2,700kg)
wheels / tyres

Smaller capacity trailers
can be upgraded to 12"
Heavy Duty wheels / tyres,
lowering deck by 25mm.

13" wheel

12" wheel

*Unladen deck height

○ Upgrade to full LED lighting

Replace bulbed rear lamps with
LED technology. Super bright
and extremely durable.

○ 2-way hinge tailgate
allows easy switching between
aggregate spreading and
bulk tipping functions.

Rear post load guides prevent
aggregate build-up in corners
during discharge.

○ Electric winch option
with roller guides.

Tight tailgate seal ensures retention
of loose materials during transit.

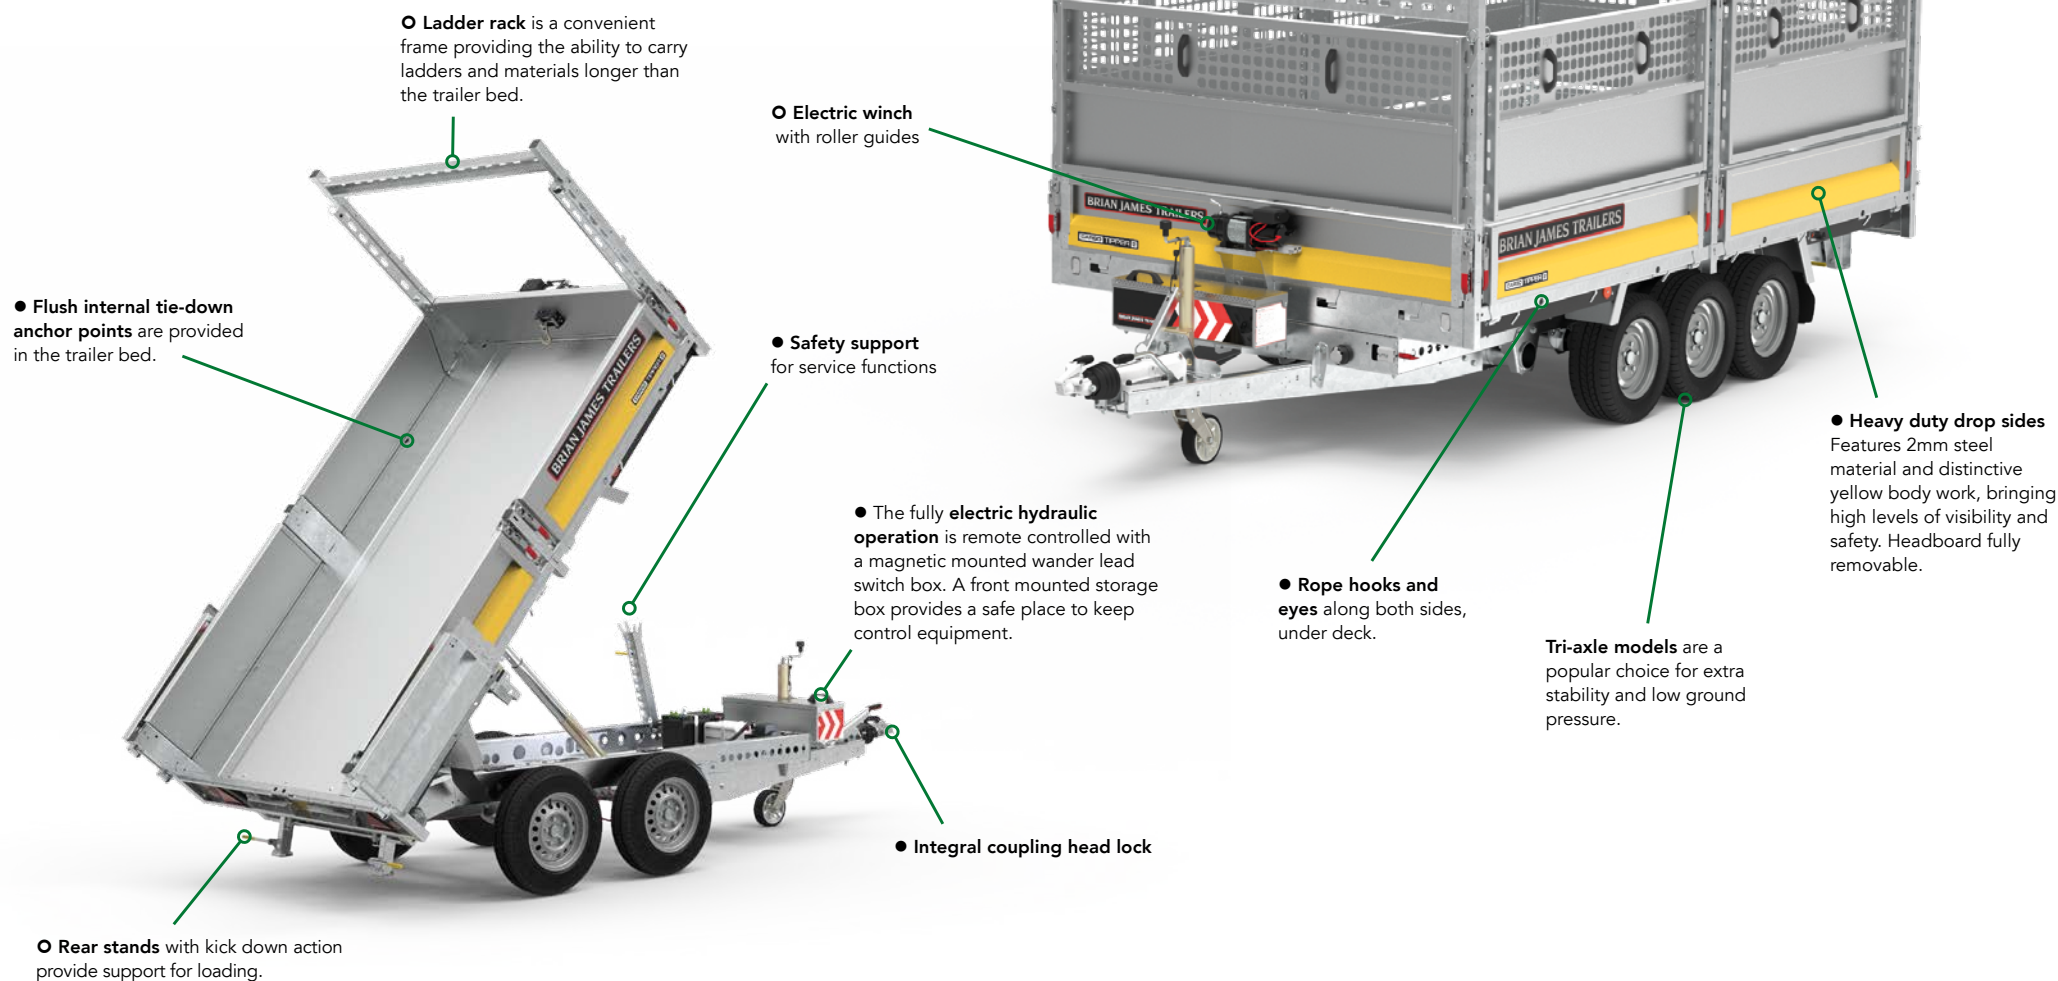

○ Ladder rack is a convenient frame
providing the ability to carry ladders and
materials longer than the trailer bed.

QUALITY

Brian James Trailers are manufacturers of class leading trailers, since 1979. When you buy a Brian James Trailer you can be absolutely certain that it is designed and constructed to the highest possible standards. Our Engineers combine top-quality craftsmanship with the best materials and first-class presentation. Light but strong, our trailers are crafted to enhance safety, efficiency and durability.

5 Year Chassis Warranty

This Brian James Trailer is provided to you with a non-transferable manufacturers warranty covering the integrity of the chassis for a period of 5 years from the date of first registration.

We warrant that under normal use, outside of accident damage or misuse (meaning driven across unsuitable territory or being overloaded) the chassis will not fatigue or fail to be able to perform its intended duties safely.

Any repair or rectification as a result of a claim under this warranty will be at Brian James Trailers cost and be carried out either at a Brian James Trailers main dealer, or at the factory HQ in Daventry, UK, at the discretion of Brian James Trailers Ltd. A repair may involve removal of the original galvanised surface finish, for which we will not be liable to reinstate to its original state.

Brian James Trailers will not be liable for any consequential loss in connection with a claim on this warranty, including recovery fees or transport to or from the place of final repair.
